## SUMMARY

---

Third year Telecommunications engineering student ENSTICP specializing in network infrastructure and satellite communications. Hands-on experience with routing, switching, VLANs, and IP networking through academic projects and internships at Algérie Telecom. Currently pursuing CCNA certification. Complementary experience in data processing and machine learning applied to multilingual datasets. Seeking to contribute to large-scale telecom systems and network optimization.

## EXPERIENCE & PROJECTS

---

**Algérie Télécom Satellite,** 01/2025 – 01/2025

*Intern – Satellite Communications*

- Analyzed VSAT ground station architecture and IP-over-satellite communication systems
- Observed and documented real-world satellite network infrastructure and operations

**Algérie Télécom,** *Intern – Network Infrastructure* 01/2024 – 01/2024

- Configured basic VLANs and ACLs on Cisco equipment
- Practiced network troubleshooting and topology analysis

## TECHNICAL SKILLS

---

**NETWORKING & TELECOM,** *Routing & switching, Vlan, ACLs, IP Addressing, Network Troubleshooting*

**PROGRAMMING LANGUAGES,** *Python, javascript, react ( frontend developer )*

**DATA & AI,** *Pandas, Numpy , Scikit-learn, XGBoost, TF-IDF, DziriBert*

## PROJECT

---

**Forsatic datathon,** *Algerie telecom* 12/2025 – 12/2025

- processing 15,000+ multilingual comments (AR/FR/EN)
- Improved dataset usability and consistency for classification tasks
- model training using XGBoost and DziriBERT

**NASA Space Apps – Agri Tech Simulation** 11/2025 – 11/2025

- Implemented C# scripts to integrate NASA datasets (weather, soil conditions) into the simulation
- Developed a 3D agricultural simulation in Unity to model farming environments and land-use scenarios

## EXTRACURRICULAR ACTIVITIES

---

**AI Mentor & Curriculum Developer,** *AI Forge (Boeing & World Learning Sponsored)*

- Designed and delivered structured AI curriculum covering machine learning fundamentals and hands-on projects
- Mentored students through practical implementation and problem-solving

**IT Manager,** *Future Tech Club*

- Led organization of technical workshops in networking, AI, and software development;
- Coordinated and executed a multi-track hackathon (Hogwarts Hack) involving development, AI, and design participants
